August 27-29, 2018
Valencia, Spain

About conference

Cognizance Scientific warmly welcomes all participants across the globe to attend World Congress and Expo on Traditional Medicine is going to be held in Valencia, Spain during August 27-29, 2018. Traditional Medicine mainly focused on “Accentuating well-versed professionals to redirect growth of Traditional medicine nexus” and its agenda is to produce high-quality current research and best practices highlighted keynote presentations, oral and posters abstracts.

Traditional medicine includes medical aspects of traditional knowledge that created over eras inside different societies before the period of a present-day drug. The World Health Organization (WHO) characterizes traditional medicine as “the whole of the learning, abilities, and practices in view of the speculations, convictions, and encounters indigenous to various societies, regardless of whether logical or not, utilized as a part of the upkeep of wellbeing and in addition to the avoidance, conclusion, change or treatment of physical and mental illness”

Traditional medicine may incorporate formalized parts of folk medicine, in other words, longstanding cures passed on and practiced by lay people. Certainly, traditional medicine and indigenous medicine have the parallel significance as folk medicine, while the others ought to be seen rather in a modern or modernized context. These are naturally occurring plant-derived substances with negligible or no industrial processing that have been utilized to treat illness. Folk medicine constitutes of the healing practices and ideas of body physiology and health preservation known to some in a culture, transmitted casually as general knowledge, and practiced or connected by anyone in the culture having prior experience. Folk medicine can be called as traditional medicine, natural medicine, alternative medicine, or indigenous medicine. These terms are frequently considered interchangeable; despite the fact some creators may prefer either due to specific overtones they may wish to highlight.

At the point when embraced outside of its traditional culture, traditional medicine is frequently called alternative medicine Practices known as traditional medicines include Ayurveda, Siddha medicine, Unani, Islamic medicine, Iranian (Persian), ancient Iranian medicine, traditional Chinese medicine, traditional Korean medicine, acupuncture. Central regimens disciplines which concentrate traditional medicine include herbalism, ethno botany, ethno medicine, and medical anthropology or therapeutic human sciences. In some Asian and African countries, up to 80% of the population depends on traditional medicine for their primary health care needs.

Market Report Traditional herbal medicines are getting huge consideration in world health debates. In China, herbal medicine played a prominent role in the strategy to contain and treat SARS. 80% of African populations utilize some type of traditional herbal medicine.

Traditional Medicine products in Japan posted current value growth of 1% in 2016 to achieve sales of JPY382 billion. While an herbal/traditional cough, cold and allergy (hay fever) remedies, herbal/traditional dietary supplements and herbal/traditional dermatological registered an increase in sales, all other categories posted a decline. Herbal/traditional dietary supplements remained the largest section, accounting for a 60% share of overall value sales. Traditional Medicinal products are projected to record a value CAGR of 1% at constant 2016 prices over the forecast period, with sales set to reach JPY392 billion in 2021.

Also, with launching of better-developed policies and implementing focused action plans per the World Bank Report 1998, the expected growth is of about US\$ 5 trillion by 2050 of world trade in medicinal plants and related products
