## Headlines:

- Allocation of 1300 billion tomans for the development of medicinal plants cultivation (ISNA, 2021 August 17).
- Planning for the development of 2,000 hectares of medicinal plants in 1400 (Rahdana, 2021 August 15).
- Harvesting 20 tons of medicinal plants in the best weather year (Rahdana, 2021 August 17).
- Exporting medicinal plants requires a trustee (Bazar, 2021 August 18).

## Conferences:

It tends to grow more prolifically in warm climates on decaying hardwood logs and stumps. *G. lucidum* is of particular interest because it has been portrayed as a "fix-it-all" herbal remedy for maladies.

## Iranian Medicinal Fungi

### *Granoderma lucidum*

considered to be the most beautiful shelf fungi, it is distinguished by its varnished, red surface and it grows on the stumps and logs of conifers, especially Hemlock.
